

Sean C. Crimmins, President, TPG Green Solutions, LLC

Sean Crimmins is a nationally recognized erosion control specialist. He received his Bachelor of Science degree from Indiana University, School of Public and Environmental Affairs Management in 2006. He now serves as President for the recently formed company, TPG Green Solutions, which includes among its founders NWC member Don Miller, President of Mt. Vernon Barge Service. TPG Green Solutions is committed to providing correctly engineered and guaranteed green solutions for site specific applications, and only uses the best manufactured products. TPG Green Solutions is also committed to using only products made in the United States. TPG Green Solutions is qualified to oversee and inspect the installation of all of the products they recommend.

For the past three years, Mr. Crimmins has managed project designs utilizing specialty materials to control erosion, enhance wetlands and stabilize shorelines. He is experienced in supplying design specifications, providing budget pricing for Professional Engineers, Landscape Architects, and governmental agencies, and is experienced in arranging delivery of project materials to contractors and developers nationwide. Prior experience includes designing and supplying bioengineered solutions for shoreline projects on lakes, ponds, rivers, beaches and streams, including positions with the world's largest rolled erosion control blanket manufacturer, North American Green, and D2 Land & Water Resource, Inc. as national sales manager for the specialty erosion control materials division.
